Part 2. Buying and Selling Currency. Obtain cash in your local currency. Find a currency exchange broker. Look for brokers that offer low spreads. Start placing currency transactions with your broker. Set stop-loss orders. Record the cost basis for your transactions. Limit the amount of currency trading you do. Trading money, particularly in the forex market, is a speculative risk, as you are is the amount of currency that one unit of the base currency can buy. The base currency can be thought of as a short position because you are "selling" the base currency to purchase the quoted currency. . Gross Profit. In forex, it would be just as foolish to buy or sell 1 euro, so they usually come in "lots" made is returned to you and a calculation of your profits or losses is done. Example of a Forex Trade: The EUR/USD rate represents the number of US Dollars one Euro can purchase. If you believe that the Euro will increase in value against the US Dollar, you will buy Euros with US Dollars. If the exchange rate rises, you will sell the Euros back, making a profit. But currency trading offers a bit of protection by being a bit less flexible: You can't buy any nation's money on margin, so unlike equity trading. The main way that you can realise a profit from forex trading is when the value of one currency changes relative to the other. Say you lodge a 'buy' order (or in other words, purchase a quantity of the base currency while selling an equivalent amount of the quote currency).
